SUBJECT INDEX

Ability Institute Tests 197
Ability, self concept and effort 281
Academic learning, U.S. 117
Accessibility 549
Access to Knowledge 763
Achievement
  anxiety and motivation 230, 307
  comprehensive schools, F.R.G. 478
  effectiveness indicator 619, 632
  motivation 305
  NAEP 667–789
  orientation 246, 249
  self-regulatory consequences of confidence and doubt 325
Action schemata 53, 54
Addition word problems 52
Administrative behaviour 607
Administrative capacity, effectiveness 604
Administrative tasks, teachers 610
Administrators, training 653
Admission to higher education
  effectiveness indicator 630
  Japan 193
  U.S. 203
Admission-by-Recommendation 194, 200
Adult education, Japan 110
Adult pressure and school attainment 251
Adventure worlds 71
Age, teachers 594
AlgebraLand 77
Alexander-James Report 737, 746
Alterable variables, State-NAEP 763
AMALIA 844
American Association of Collegiate Registrars and Admissions
  Officers 204
American College Testing Program 204
  comparison with NAEP trends 720, 729
American Educational Research Association 680
Anchoring of proficiency scales 747
Anchor tests 410, 423
Ancient Art of War 74, 75
Anxiety and performance 230, 270, 272, 275, 307, 313
Anxiety, school climate 478
Anxiety and self-efficacy 294
Apprenticeship, F.R.G. 140
Aptitude–Treatment Interaction 807
Arithmetic word problems, computer models 52
Artificial Intelligence 19, 21, 81, 793, 840, 864
ASPA 828
Assessment systems, Australia 409–425
Assisted places scheme 467
Attained curriculum, SIMS 524
Attainment, effectiveness indicator 615
Attitudes 766
  effectiveness indicator 597, 623, 643
Attribution 629
Attrition, teachers 595
Australia
  A History of the Australian Education Council 1936–1986 443
  analysis of classroom dialogue 427–442
  Australian Education:Review of Recent Research 447
  choice of private school, religion and social class 351–373
  equating methods compared 409–425
  Exemplary Practice in Science and Mathematics Education 449
  higher education access and participation 375–393
  teacher self-evaluation 395–408
  trends in education 1970–1985 127
AUSTUDY 378, 381
Availability, teachers 598
Avoidance motivation 270, 317

Back to basics 492
Balanced Incomplete Block Spiraled design 674, 711, 718, 726
Balance of Power 74, 75
Basic curriculum 504
Basic education, employment 634
Basic skills 689
Beam Diagnostic Programme 237
Behaviour
  anxiety and motivation 315
  effectiveness indicator 623, 643
  problems, Japan 175
  problems, U.S. 166
  self-regulation 325
Belgium
  comprehensive secondary education and middle schools 507
  mathematics education 527
Bellack cycles 436
Benchmarks, effectiveness 654
Berufsschulen 140
Birth rate, U.S. 186
Black box expert model 794
Briars and Larkin model 57
Brittleness 22

CADUCEUS 84, 89, 99
CAMELIA 842, 844
Careers, private schooling in Australia 356, 362
Catholic schools, Australia 352, 360
Causal inference, NAEP 681
CCSSO 776
Centralism, England 464, 547
Centres of education, Belgium 511
Certificate of Secondary Education 555
Change, Combine and Compare problems 52
Character formation
  Japan 175, 176
  U.S. 118
Choice of school, Australia 351
Chunking 17
City Technology Colleges 468
Classroom behaviour 623
Classroom dialogue analysis 427–442
  measurement 428
  Thematic and Structure Analysis Technique 429
Classroom management, quest for knowledge 239
Classroom opportunities 770
Classroom utilization 600
Class size 598
Cognitive development, computer simulation 15
Cognitive engagement during instruction 287
Cognitive–motivational interactions 257
Cognitive psychology, computer simulations 9
Collége 567
College selection
  Japan 193
  U.S. 203
Common core curriculum 558
Common curriculum 463
Common test 410
Communicable knowledge 822
Community college 204
Community involvement 608
Compensatory education, Australia 131
Comprehensive schools 457
  England 1944–1987 461
  France 123
  F.R.G. 471
  learning outcomes 537
  mathematics 527
  Netherlands 499
  political backgrounds and innovation strategies 533
  problems 547
  Sweden 145, 148, 486
Computer-assisted learning 793, 839
Computer-based learning environments 71
Computer coach 800
Computer literacy 770
Computers in schools, Japan 175
Computer simulation
  expert systems 81
  impact on educational research and practice 5
  learning environments 71
  research tool in subject-matter domains 49
  rule-based and connectionist alternatives to problem solving 35
Concepts, teaching, ITS 824
Concrete Human-like Inferential Problem Solver 57
Confidence 326, 331
Connecticut Assessment of Educational Progress Program 761
Connectionism 6, 24
Connectionist models 43, 46
Construct validity, State-NAEP tests 753, 755
Consumer utility 587
Consumption behaviour 645
Content-process separation 754
Content validity 754
Context spaces 822, 832
Continuation schools, F.R.G. 140
Convenience code 20
Cooperative secondary schools, F.R.G. 473, 474
Coping
  social support 339
  strategies 232, 329
Core curriculum, F.R.G. 141
Cost-effectiveness 584
Cost-utility 584
Course-taking patterns 768
Creaming 557
Crime 643
Criterion equatings 413, 417
Criterion-referenced achievement 620
Critical argument 828
Critiquing systems 827
Cultural capital, private schools 357, 371
Culture variable, State-NAEP 763
Curriculum changes 536
Curriculum and didactics, Belgium 509, 513
Curriculum factor 551
Curriculum reforms
  France 125
  F.R.G. 141
  middle schools 459
  Netherlands 501
  Sweden 488
Curriculum, relationship to testing 621
Curriculum, secondary education
  Japan 158, 172
  U.S. 181
Curriculum, SIMS 524

Decentralisation, Sweden 492
Decision-making, effectiveness indicators 588, 651, 653
Decision process stages, higher education 382
Declarative knowledge 17
Declarative motivation 308
Democratization of education 557
Denmark 552, 556
Deriving Information 713
Development outcomes 584
Deviation model 795
Diagnosis
  CADUCEUS 84, 89, 99
  INTERNIST-I 83

Diagnosis adjustment principle 858
Diagnosis expert 801
Diagnostic potential 804
Dialogue analysis 427–442
Dialogues, tutorial 829
Didactic knowledge 802
Differentiation
  middle schools in Belgium 514
  Sweden 149
  U.S. 180
Direct equipercentile equity method 413, 420
Direct manipulation 74
Discipline 167
Discourse behaviour, medical teaching rounds 85
Discovery teaching 239, 796
Discrepancy Index 414
Disengagement 327
Domain expert 800
Domain expertise, OPTICLAB 814
Doubt and performance 326, 331
Dropping out 158
Dual system, F.R.G. 139, 140
Dynamic support 73, 75, 76

Earnings, effectiveness indicator 636, 637
Earnings function 641
Economic concepts of educational production 581
Economic concept of utility 587
Economic efficiency 578
Education Act 1944 462
Education, computer simulation 5, 26
Educational reform
  Australia 127
  France 123
  F.R.G. 137
  Japan 109, 171, 193, 215
  Sweden 145
  U.S. 115, 179, 203, 221
Educational materials, efficiency 602
Educational productivity 187
  economic concepts 581
  indicators of effectiveness 591
Educational technology 581
Educational Testing Service 197, 673, 729, 746
Effectiveness indicators
  economic concepts and educational production 581
  economic concept of utility 587
  input indicators 593
  nature of 577
  outcome indictors 629
  output indictors 615
  process indicators 607
  proposals 653
Efficiency 577
  benchmarks 654
  educational production 581, 649
Effort
  confidence and doubt 325
  impact of self-concept of ability and task motivation 281
  performance 273
  test anxiety 309, 313
Ego-orientated goals 231
Elementary Adventure 71
EMIS 656
Emotion, motivation and learning 229, 267, 307, 325
Emotional support 336
Empirical validation, simulation models 22
Employment
  effectiveness indicator 634
  further education 630
England
  comprehensive education 1944–1987 461
  education reforms and problems of schooling 547, 552, 554
  innovation history 535
  mathematics education 527
Enrollment
  attainment 615
  higher education, Japan 193
  higher education, U.S. 203, 223
  management, U.S. 207
Entrance examination, Japanese colleges 194, 197
Equality
  F.R.G. 477
  Japan 110, 111
  Netherlands 501, 502
  Sweden 149, 151
Equating methods, Australia 409–425
Equipercentile equating methods 413, 420
Equipment, efficiency 601
Equity effects of equality measures 624
Esteem support 336, 341
Ethnicity, teachers 596
Evaluating and Reacting 713
Examinations at 16 plus 465
Excellence movement 179, 186
Exercises 674
Expectancies, self-regulation 326
Expectancy-value theory of anxiety 313
Experience, teachers 594
Expertise 768
Expert systems 794
  medical teaching-rounds discourse 81
Explanatory dialogues, ITS 827, 841
Explanatory teaching 239
Extended Motivation Model 300
External anchors, test equating methods 409

Facilities, efficiency 599
Failure 314
Family background, choice of school in Australia 355, 366
Family influence, university choice behaviour 387
Federal Republic of Germany
  comprehensive schools and traditional schools 471

educational reforms 137
educational reforms and problems of schooling 548, 552
innovation history 535
middle school evaluation 566
motivation and learning 259
Fidelity 72
Flanders 510
Folkeskole 552
Förderstufe 553
Foreign language, time spent studying 769
Fortbildungsschulen 140
Foundation for Educational Research 564
Framing 488
France
educational reforms 123
innovation history 535
mathematics education 527
middle school evaluation 567
Free choice activity 487
Frequency estimation 413, 420
Further education, admission to 630
Future achievement 632

Gender
transition to higher education, Australia 379
university choice behaviour 388
General Certificate of Education 466
General Certificate of Secondary Education 466
General education, Japan 218
General Educational Development, comparison with NAEP trends 720
